FOREST INDUSTRY
CAREER MAPPING PROJECT

Be a part of this exciting project that is a first for the Tasmanian forest industry.

Understanding career entry points and educational pathways is critical to attract, recruit and retain the workforce for the future.

MAKE + INNOVATE

Artisan Production

Wood Design, Engineering + Innovation

Forest Health + Growing Trees

FOREST INDUSTRY CAREERS

Timber Haulage + Distribution

GROW + PROTECT

Carbon + Environmental Management

High Technology Machinery Operations

HARVEST + HAUL

TASMANIAN FORESTS & FOREST PRODUCTS NETWORK

TASMANIA FORESTRY HUB

WHAT IS THE PROJECT?

Researching the current and future forest industry careers, with the required skills mapped against education and training pathways with clear entry points.

WHY MAP CAREERS?

A sound understanding of current and future job needs, what skills they require and the training pathways to develop those skills is essential to attracting, recruiting and retaining the forest industry workforce of the future.

HOW IS IT BEING DONE?

RMCG have been contracted to identify current and future jobs and careers; detail the skills and the key entry points for these careers, and map the training pathways.

WHO IS INVOLVED?

Everyone in the forest industry can be involved. Employers or employees, educators or industry associations. Also engaging with other Forestry Hubs to identify synergies and scalability.

WHAT CAN YOU DO?

Participate in the consultation by providing feedback on what you believe are the current and future careers and what skills are needed to do these roles.
